

BRASS BIRMINGHAM

2-4 120 3.9

Global

Place board, and for matching #p: {shuffled deck, (white) Wild Location- and Building cards and Merchant tiles (random, and place Beer(barrel) next to each non-blank tile)}.

Fill Coal&Iron markets (skip dotted spaces).

TurnOrder: random (place Portraits)

Player

Take playerboard (place Building tiles, half-black facedown) and \$17. **Set** Income/VP markers to 10/0. **Draw** 9 cards: 8 into hand, 1 facedown into discard pile.

Round

Starting in CanalEra, play until deck & hands run out. Then reshuffle discards, deal 8 to players and repeat for RailEra. **Round: {1}** Player takes Turn, play proceeds clockwise. **{2}** Set TurnOrder via spent \$ (lowest first, ties = maintain relative order). **{3}** Income.

Turn

Perform 2 Actions (discard 1 card per Action) & refill hand to 8 cards (if possible): **{a} Build** (see section). **{b} Network:** pay cost, place Boat/Train. **{c} Take Loan:** take \$30, lose 3 Income *Levels* (set marker in highest spot) **{d} Develop:** remove 1/2 tile(s) and pay 1/2 Iron (crossed-out-lightbulb on tile = can't be developed) **{e} Sell:** Flip Manufacturing/Pottery/CottonMill Building(s) (*any/all*) if connected to matching Merchant and able to pay any required Beer for each (from *connected* Merchant tile (gain bonus), or *connected* enemy Building, or *any* of own Breweries). **{f} Scout:** discard 2 extra cards, take Wild Location- and Wild Building card. **First round:** 1 action only.

Victory

Game ends after RailEra (skip Income step).

★ ERAS

CanalEra: Boats only, max 1 Building per player per location. **RailEra:** Trains only, any amount of Buildings per player per location. Level 2+ Breweries now gain 2 Beer.

End of Era Scoring: {1} Score & remove Links. **{2}** Score flipped buildings (CanalEra: remove built Level1 Buildings). **{3}** Refill Beers at Merchant tiles.

★ ACTION: BUILD

{1} Discard Location card to build (any), or discard Industry card to build matching Building in *YourNetwork* (*any* if no network). Obey Era restriction, and Location must have *available & matching* Industry (if multiple spots, use spot with 1 Industry first). **{2}** Pay Cost. **{3a}** If applicable, place indicated Coal/Iron/Beer on Building. **{3b}** Sell Iron to fill Market. Do same for Coal if connected to a CoalMarket. **Overbuilding possible:** place higher-leveled Building on your existing Building (if no matching resource on board, may overbuild opponent's Coal/Iron mine).

★ PAYMENT

Coal from connected Coal source (Building or Market). **Iron** from *any* Building, or Market if none available.

★ CONNECTIONS

Locations are *connected* regardless of who owns the Links, but **YourNetwork** consists of Locations connected by *your* Links and/or containing *your* Building(s).

... MISC

Spent \$ goes on portrait. **Wild cards** are returned to respective decks after use. **Limit** for Income is 100 (no VP limit). **Flip Building** once final resource is consumed (player gains Income). **BeerFarms** are not locations.
